### DC Motor - Efficient, Cost Saving, and Quiet

The most energy-efficient ceiling fans on the market right now are DC or direct current, fans. The key to their improved airflow and low energy consumption is their motor, which also helps you save money on your electricity bill. Since the motor is small and light, DC ceiling fans have sleek designs that fit better in your interiors and cost just one cent an hour to run. Additionally, they are silent in operation, making them ideal for private spaces in your house like the bedroom. You have a lot of versatility with the speed settings of DC fans, which range from a light breeze to an extremely intense airflow.

### Remote Control

7-speed plus turbo mode remote control with timer function and natural wind mode included. For instructions on how to pair the remote, please follow the steps in this video: [Remote Pairing](#)

### Optional Light

Versatility to use light with a GX53 globe (sold separately), or use included cap to cover the socket for a no light option.

### Coastal Rating

Suitable for indoor, alfresco, and coastal areas provided the fan is fully undercover, protected from water, wind, and dust, with a minimum of 1 wall.

### Recommended Room Size

For rooms between 4m x 4m or greater, we recommend a fan between 142cm and above.
