

## Lucci 1 Metre Aluminium LED Surface Profile in Silver

SKU: 177139

### Details

Add a clean, professional finish to strip lighting on flat surfaces with this 1 metre aluminium surface profile in silver and opal. Simple and versatile, it is ideal beneath cabinets, along shelving, inside wardrobes and in other areas where a recessed installation is not suitable.

The aluminium channel helps protect the LED strip during installation, while the opal diffuser creates a softer, more even line of light. The profile can be cut to size to suit your layout.

### Compatibility

Designed for use with Lucci Glow Classic and Lucci Glow Dynamic LED Strip Light kits. Compatible with LED strip up to a maximum width of 12.5mm.
