

MFL Lunar 1 Light 225mm Flush Mount in Black

SKU: 087156

Details

The MFL Lunar flush mount is a modern architectural lighting fixture made of durable steel and available in both white and black powder coat finishes. Designed for ceiling mounting in large, open spaces with high ceilings, the Lunar provides ample illumination.

Lunar includes various customisation options, such as white, black, and brass baffle rings and a honeycomb diffuser, to control glare and adjust its appearance. It is compatible with GX53 globes and the Lucci Connect app for smart functionality. Furthermore, the Lunar collection features Live Well Day Night Sleep technology. Engineered to help you get the most out of your day, increase concentration and improve your sleep. During the day, the Day Scene setting fills your space with energy-boosting light scientifically proven to make you feel more alert and energised.

When set to Night, the health light reduces blue light and lowers the colour temperature to promote the production of melatonin, the hormone that prepares your body and mind for sleep.

When it's time for bed, the Sleep Scene provides an ultra-soft and warm light that's perfect for late-night thoroughfares and bathroom wakeups without causing further interruption to your body's melatonin production. Lunar's size and features also make it the ideal night light for children's rooms and nurseries – with Sleep Scene providing the perfect light for everything from dream feeds to monster deterrents.

Featuring a sleek cylinder design with an adjustable GX53 globe holder, the Lunar flush mount is suitable for spaces with high ceilings and large areas.
