

Siemens Compact RCBO 1 Module 6KA 20A C-Curve

SKU: 299500

Details

The Siemens 20 A compact RCBO circuit breaker is a reliable solution for circuit protection needs. It is designed to provide protection against residual current and over-current in domestic homes and buildings. This RCBO circuit breaker has residual current (30mA) protection and over-current circuit protection, which ensures the safety of electrical circuits. Its two-pole C-curve tripping class ensures reliable performance, even in challenging conditions. The product is available in a range of current capacities and has a compact design, which makes it easy to install and fits seamlessly into existing electrical infrastructure. The product is made from heat and flame-retardant plastics, ensuring durability. It is an ideal choice for safety and circuit protection.

Specifications

SKU	299500
Brand	Siemens
Globe Quantity	0
Ip Rating	IP20
Double Insulated	false
Voltage	230/240V
Poles	2
Current	AC
