

Siemens RCD Two Pole 6KA 40A

SKU: 299506

Details

The Siemens 2 pole RCD circuit breaker is a cost-effective solution for residual current protection. It provides residual current (30mA) protection and is a two-pole circuit breaker with a current capacity of 40A.

With a compact design of H: 90mm W: 36mm D: 70mm and a 2-module width, it is easy to install and compatible with existing electrical infrastructure. Made of heat and flame-retardant plastics, it is durable and long-lasting.

This product is popular among domestic home builders and electricians. The Siemens brand is well recognised for providing high-quality electrical components, ensuring a reliable and trustworthy product.

In summary, the Siemens 2 pole RCD circuit breaker is a cost-effective, reliable, and well-designed product that provides residual current protection. Its compact design and compatibility make it an easy installation for domestic homes and buildings.

Specifications

SKU	299506
