

Siemens Single Pole 6KA 16A C-Curve

SKU: 299491

Details

Siemens offers a A single pole miniature circuit breaker that provides over-current circuit protection. It is available in a range of current capacities and has a C-curve tripping class. The breaker has a compact design, with dimensions of H: 90mm, W: 18mm, and D: 76mm, making it a 1-module width.

This circuit breaker is designed to provide safety and conduit protection for domestic homes and buildings. It is made with heat and flame-retardant plastics and is easy to install. We carry the most popular sizes for domestic home builders and electricians.
